👤 SUMMARY

I am a passionate front-end developer with a strong academic foundation, holding both a Bachelor's in Computer Science and a Master's in Business Informatics from the University of Tirana. With hands-on experience building dynamic and responsive web applications using technologies such as React.js, TypeScript, Next.js, and Tailwind CSS, I have successfully delivered projects like Lani Builders and Pet Expo. Currently, as a Front-end Developer at CodeLab, I design and implement engaging, user-friendly interfaces that bring innovative solutions to life. My commitment to continuous learning and collaborative teamwork drives me to contribute effectively to forward-thinking organizations.

🎓 EDUCATION

Master Degree on Business Informatics

10/2023 – 07/2024

FSHN, University of Tirana

Tirana, Albania

Subjects

- UI - User interface
- Project Management for Software Products
- Mobile Programming

Computer Science

10/2020 – 07/2023

FSHN, University of Tirana

Tirana, Albania

Subjects:

- JAVA SE 8
- HTML/CSS/JS (jQuery)
- PHP
- NETWORKING Fundamentals CISCO Packet Tracer
- MySQL (Oracle)

👜 PROFESSIONAL EXPERIENCE

Code Lab

01/2025 – present

Joined CodeLab in January, I contribute as a front-end developer in a dynamic startup environment. My role involves designing and implementing responsive, user-friendly interfaces using modern web technologies such as JavaScript, React, TypeScript, and Tailwind CSS.

Tirana

📁 PROJECTS

Teltonika GPS (React, TypeScript, and Tailwind CSS)

present

<https://gitlab.com/regimele7/teltonika-frontend>

Responsive front-end application for real-time vehicle monitoring. This project features live tracking, float monitoring, fuel consumption analysis, and temperature monitoring, enabling efficient fleet management through dynamic data visualization.

Lani Builder's (TypeScript, React.JS, Next.JS, TailwindCss)

<https://github.com/redoncanaj1/lani-builders>

Link: lani-builders.vercel.app 

Lani Builders is a responsive website crafted to showcase a modern digital presence for a building services business. Developed using Next.js, React, TypeScript, and Tailwind CSS, the project emphasizes dynamic content rendering and intuitive navigation. It delivers an engaging user experience with clean, visually appealing design and optimized performance for both desktop and mobile users

Pet Expo (HTML, TailwindCSS, daisyUI, JavaScript, ReactJS.)

<https://github.com/redoncanaj1/pet-expo>

Pet Expo is a responsive front-end project built with React.js, JavaScript, Tailwind CSS, and daisyUI. It showcases a modern and visually engaging platform for pet-related events and services, focusing on clean design, smooth user interaction, and accessibility across devices.

Piperke (HTML, CSS, JS, PHP, PhpMyAdmin)

<https://github.com/redoncanaj1/Piperke>

Piperke is a full-stack web project that integrates both front-end and back-end development. The user interface is crafted using HTML and CSS, while PHP handles server-side logic, with PhpMyAdmin facilitating efficient database management

COURSES

MERN(Mongo.DB, Express.js, React.js, Node.js)

10/2023 – 02/2024

BetaPlan

Successfully completed a MERN stack course at BetaPlan (Bootcamp), gaining valuable skills in:

- React.Js
- Mongo.db
- Expres.Js
- Node.Js

PHP/Laravel

04/2023 – 06/2023

ICTSLab

I have completed a course in lctsLab on:

- HTML/CSS (Bootstrap)/JS
- PHP - Laravel Framework
- SQL
